Bajaj Finserv Balanced Advantage Fund (With Behavioural Edge) An Open Ended Dynamic Asset Allocation Fund July 2024

BAJAJ FINSERV ASSET MANAGEMENT LIMITED

1

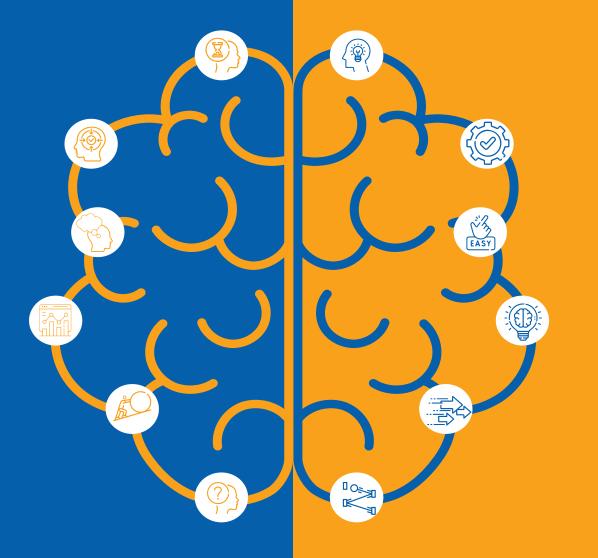

How does our brain process and make decisions?

Left Brain

- Slow
- Deliberate
- Analytical
- Conscious
- Tires quickly
- Lazy

Driven By Information, Data, Logical Reasoning

- Fast
- Automatic
- Intuitive
- Instinctive
- Subconscious
- Involuntary

Driven By Emotions And Intuitions

Our emotions often overpower our logical thinking

Our brain is a complex organ that has evolved over millions of years to help us navigate the challenges of life

It has developed advanced logical thinking abilities

However, it also retains more primitive, emotional, and instinctual responses that can sometimes override our logical thinking

Emotions frequently steer us away from making rational decisions

Starting a task early and working on it consistently is the logical approach, but our emotions often lead us to procrastinate until the last minute. Making impulsive purchases or spending beyond our means because of the momentary joy of acquiring something. The emotional pull to stay in our comfort zone can make us skip workout sessions.

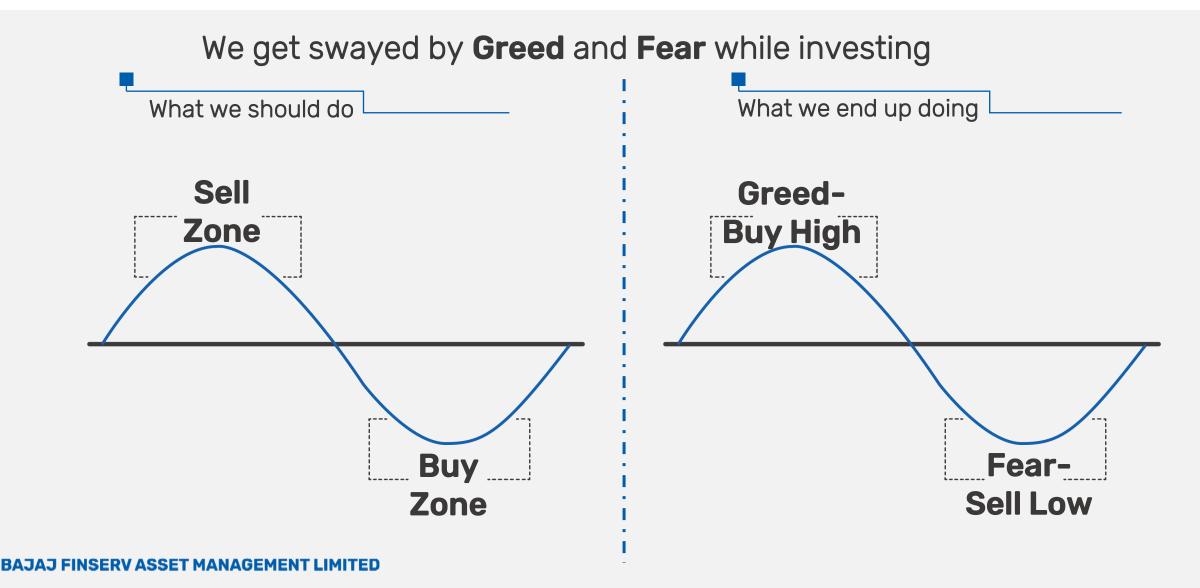

When stressed, we might indulge in comfort foods even though we're aware that it's not a

healthy coping mechanism.

FINSERV

BAJA

Our emotions override logical reasoning while making investment decisions as well

Б

BAJA

FINSERV

Our investment decisions get impacted due to various emotional biases

Regret Aversion Bias

Clinging to loss making choices to avoid regret leads people to continue with loss-making decisions in down cycles.

Trend-Chasing Bias

Focusing on past performance, ignoring other factors.

Loss Aversion Bias

Fear of loss prevents from seeking gains.

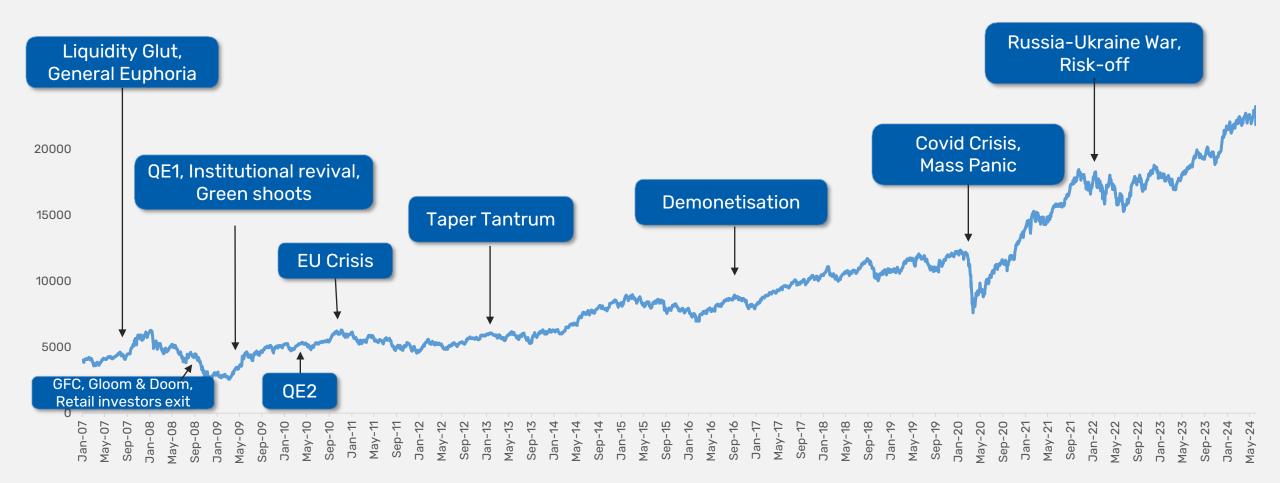

Herd Mentality Bias

Following the crowd without independent analysis.

Market volatility impacts our emotions & behaviour

People feel optimistic and positive when the market peaks and anxious when the market nose-dives

Source: NSE; Data as on 31st May 2024. Past performance may or may not sustain in future

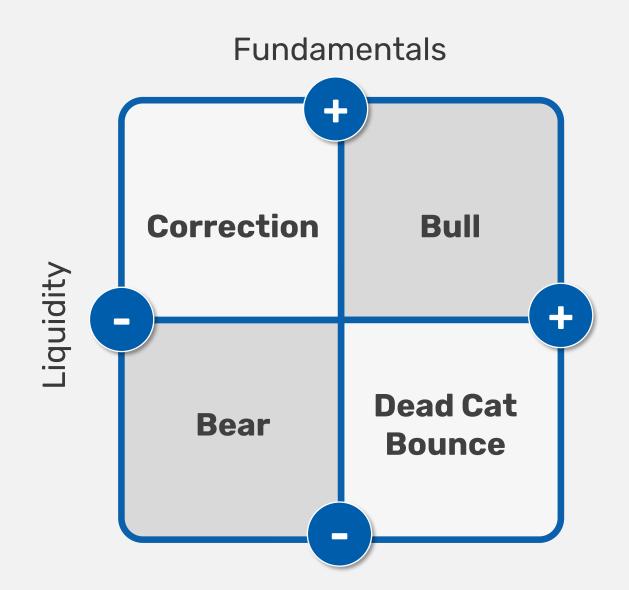

Introducing Bajaj Finserv Balanced Advantage Fund (With Behavioural Edge)

BAJAJ FINSERV ASSET MANAGEMENT LIMITED

8

Market trends basis fundamentals and liquidity

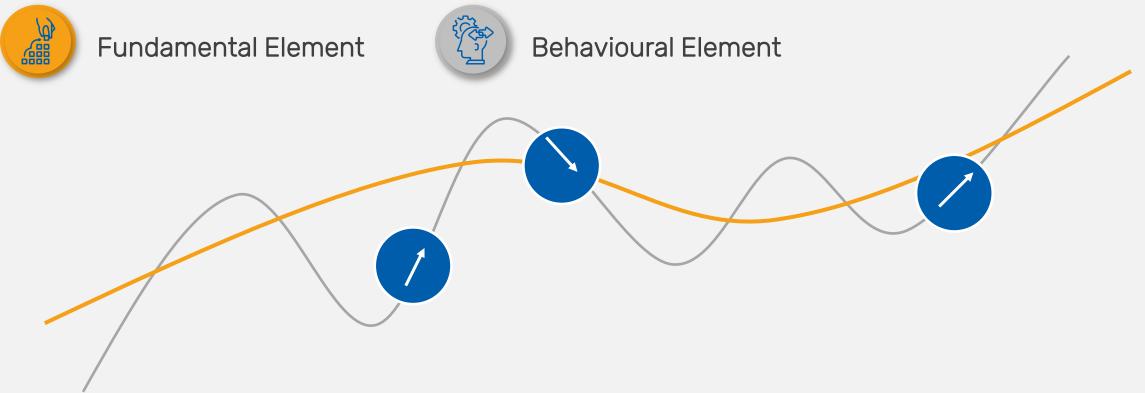

Approach

What moves the market?

The stock market is the story of cycles and of the human behaviour that is responsible for overreactions in both directions.

With Bajaj Finserv Balanced Advantage Fund,

emotions take a back seat, and logic steers the ship.

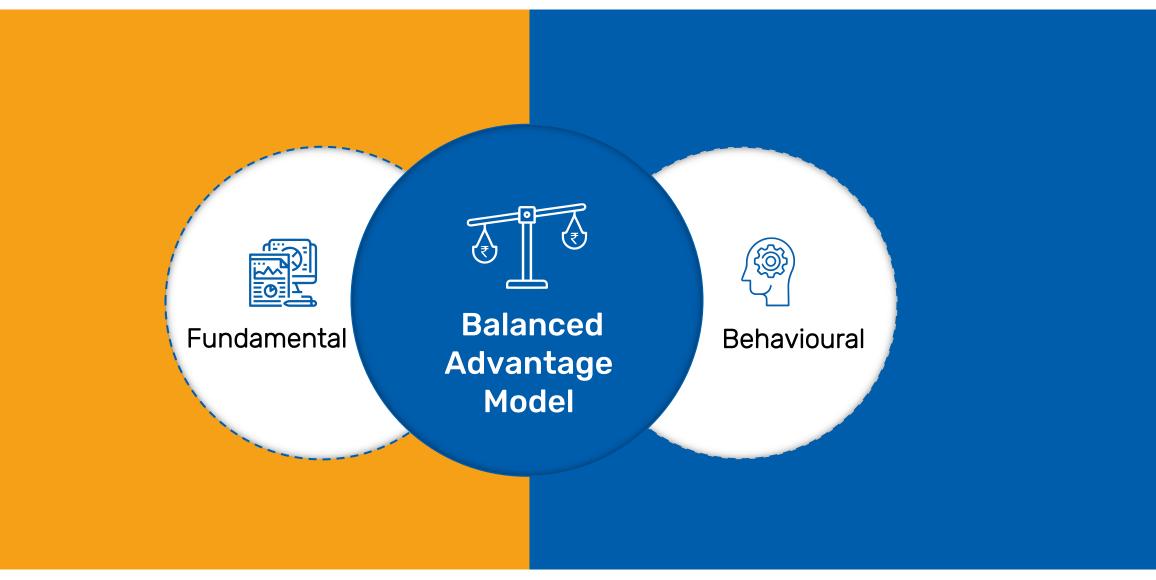

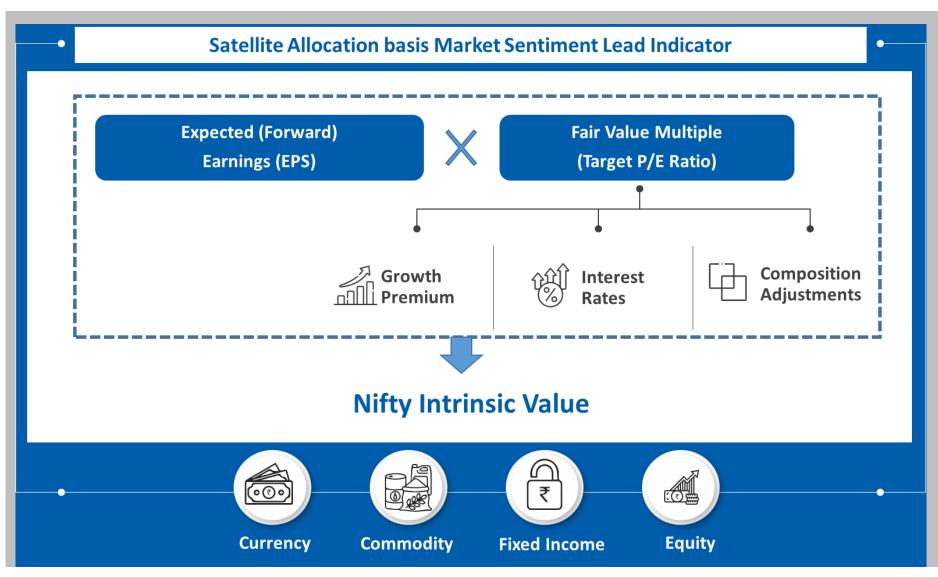

**Indicative allocation and this can change based on market conditions and investment opportunity available *Includes Net Equity & Arbitrage

The fund model will determine market's intrinsic value & make behaviour based adjustments. It will change the asset allocation accordingly and rebalance the portfolio from time to time.

Bajaj Finserv Balanced Advantage Model = Fundamental + Behavioural

Bajaj Finserv Balanced Advantage Fund - Model Overview

 Estimate market's intrinsic value: Forward EPS, growth premiums, and interest rate.

FINSERV

- Gives core allocation signal.
- Sentiment analysis: Using commodities, currency movements, yield indicators.
- Signals early warnings of market cycles, both bullish and bearish.
- Together, the two broad indicators confirm and indicate market entry and exit points.

Fundamental Elements

Which fundamental elements move Nifty 50?

 Nifty 50 has a very weak correlation with GDP – constituents and weights

 But, has a strong correlation over long term to earnings

Ideal Earnings is Forward Earnings Ideal Valuation is Comparative and not Absolute

*Based on Internal Analysis

	Factors	Interplay
00	Currencies	Certain currency pairs reveal the mood and the bias of the currency market whether they are in risk-on mode or are operating as safe haven.
	Commodity	Studying commodities price movement between energy, industrial, precious, and soft commodities reveals the broad commodities view regarding the economy and the business outlook across the world.
	Bond	Spread between the emerging and developed market; corporate bond and government securities; slope of the yield curve; captures the sentiment of bond traders and prevailing global liquidity.
	Equity	Equity investors reveal their view and sentiment about the equity market through choices of market cap and position between different sectors.

Fundamental Elements

Ideal Valuation (Comparative)

P/BV

- Values Assets
- Less volatile than earnings but way less representative
- Many businesses in Nifty 50 are asset-light

Thus, P/BV can not be used broadly for all sectors

M-Cap/GDP

- Ignores quality of business, keeps trending higher
- Thus M-Cap/GDP can not be used broadly for all stocks/businesses

Hence P/E:

Though tough,

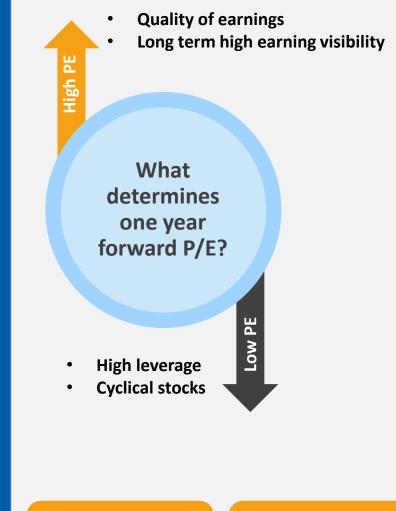

remains Appropriate!

P/BV- Price/Book Value, M-Cap – Market Capitalization, GDP – Gross Domestic Product, P/E – Price/Earning

*Based on Internal Analysis

BAJAJ FINSERV ASSET MANAGEMENT LIMITED

BAJAJ

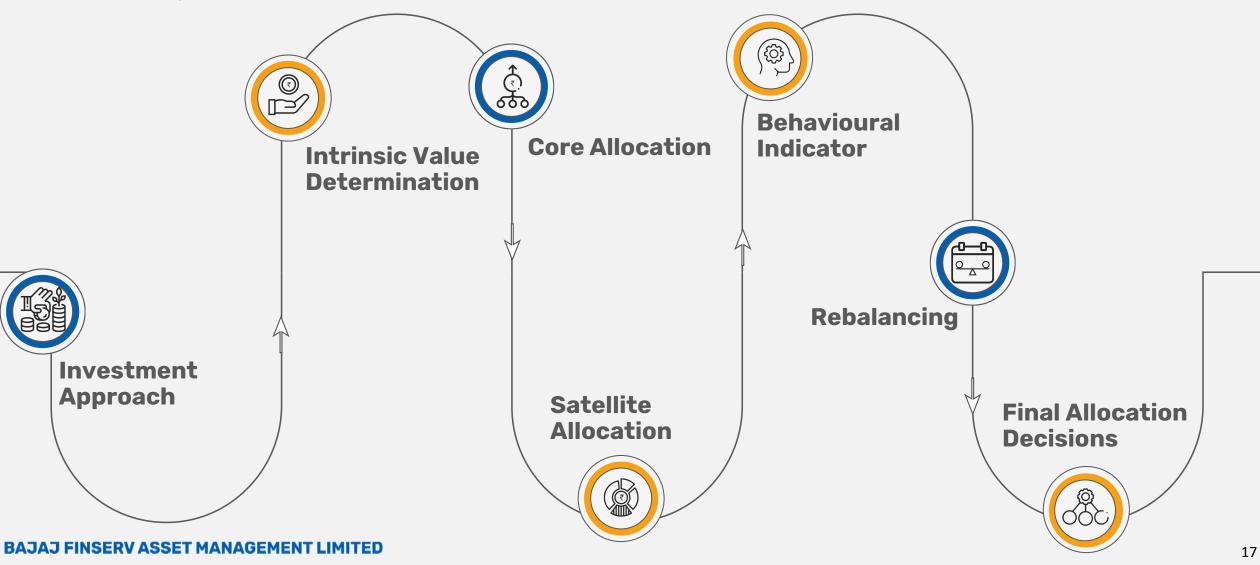

Ideal Earning* One year Forward Earning Ideal Valuation* One Year Forward P/E

16

How does it work?

The fund follows a proprietary INQUBE investment philosophy that combines informational, quantitative, and behavioural edges for competitive performance.

Has the Model Delivered?

BAJAJ FINSERV ASSET MANAGEMENT LIMITED

18

BAF Model equity allocation across different market conditions

Note: Model Equity level shown above is for illustration purpose only and should not be used for development or Implementation of any Investment strategy. It Should not be construed as an Investment advice to any party. The net equity allocation is based on internal proprietary model which is derived from retrospective analysis. Actual allocation and investing experience may vary from the theoretical stance. Fund manager holds the final prerogative to ascertain whether any security/asset provides the investment benefit to the fund and is in keeping with the larger investment goal, strategy and the investment & operational mandate of the fund. As such the fund manager may or may not choose to invest in a particular holding. The portfolio construction is the purview of the Fund Manager and allocation may change from time to time. Past performances may or may not sustain in future.

BAF Model intends to mitigate biases during investment which is being reflected under various market conditions

Equity Allocation rises with

fall in market valuation

Equity Allocation falls with

rise in market valuation

The computation of returns disclosed is based on analysis of the Balanced Advantage Fund model proposed to be undertaken by Bajaj Finserv Asset Management Limited. Please note that these are provided for illustrative purposes only to explain how the model would function in different market conditions. This model does not in any manner indicate the actual scheme performance would be based on the Scheme Information Document, asset allocation and scheme investment strategy. There is no assurance or guarantee that the scheme would at all points in time be able to deploy as per the model as the same is based on market conditions. The Balanced Advantage Fund model would undergo changes as per the scheme investment strategy disclosed in the Scheme Information Document. Past performance may or may not be sustained in future. An investor must not solely rely on this model and the scheme presentation to invest in the scheme but should go through the Scheme Information Document and consult with a financial advisor before undertaking investments in the scheme but should go through the Scheme Information Document and consult with a financial advisor before undertaking investments in the scheme. Past Performance may or may not sustain in future. Source – MFI & Internal Analysis.
